## **DROP-NET**

Animal live-capture system used to capture a wide variety of wary animals. A capture net is suspended on four corner poles, one at each corner of the net. Larger nets will also require a centerpole. A 12 volt power supply (not included) charges powerful electromagnets to hold the net on each pole. Animals are baited under the net. Once in position, a wireless remote control is used to turn off power to the electromagnets and the net falls. Animals must then quickly be restrained, hobbled and blindfolded. Our system is designed to be silent and reliable. Four sizes are available to handle a variety of management objectives.

Poles are cut to 4' lengths with internal connecting sleeves for portability and ease of use. The poles and connectors are shipped in a Pelican® brand carry case. The release mechanisms are shipped in a separate carry case.

Everything you need is included in this system except the 12 volt power supply (We recommend Optima® brand batteries) and a hammer which you will need to drive stakes into the ground to support the poles and attach guy ropes. Operating time depends on the size of the capture net and quality of the battery. The net can be locked mechanically (no power needed) for set-up and periods of inactivity. A quality battery that is fully charged will power the system for 8 hours.

The system ships via UPS ground in four separate cases. Total weight depends on the size, average 200lbs. Average shipping cost is \$200.00.

Each drop-net system includes:

One capture net (mesh size is built to suit, nets are interchangeable)  
All poles and connectors  
Stakes and guy ropes  
Release mechanism  
Remote control & receiver  
Connecting wires  
Carry cases

Four sizes are available:

30'x 30'

Highly portable, suitable for smaller areas

Price: \$3750.00 plus shipping

Please allow 3-5 weeks for delivery

40'x40'

A popular size, good portability and easy to set-up

Price: \$4750.00 plus shipping

Please allow 3-5 weeks for delivery

50'x50'

A good compromise between the 40' and 60' systems

Price: \$5250.00 plus shipping

Please allow 3-5 weeks for delivery

60'x60'

For the most ambitious projects

Price: \$5950.00 plus shipping

Please allow 3-5 weeks for delivery
